

ALMA BEAUTY REJUVE is a highly effective skin rejuvenation solution, used successfully in over 6,500 clinics worldwide

Based on the new Dye-PL technology, it is as **effective as laser treatments**, combined with the safety, versatility and low-cost of pulsed light.

Dye-PL is a high-end, professional-grade skin rejuvenation technology. It is one of the most efficient methods used to achieve uniform skin tone and texture, with fewer treatments and faster results.

The unique **combination** of Alma's exclusive **Dye-PL and AFT technologies** targets all layers of hyperpigmentation, including dark skin, as well as **all types of pigmented and vascular lesions**.

Patented SHR technology makes Rejuve the safest and most effective laser rejuvenation solution available today.

Features

Light Source: AFT (Advanced Fluorescence Technology)

Applicators

The ergonomic, lightweight design of the system's applicators makes treatments easier for practitioners to perform, while providing a more comfortable experience for clients.

Speed AFT *SHR Hair Removal Technology*

Specifications:
Wavelength 700-950 nm, spot size 6.4 cm²
