DEKA
Innate Ability

MOTUS AY Quick Wins:

Hair Removal | Vascular Lesions
Benign Pigmented Lesions | Onychomycosis
Non ablative Skin Rejuvenation
Pseudofolliculitis Barbae (PFB) | Leg Veins

Key Principles

Motus AY uses a combination of the most common wavelengths: **Alex 755 nm** – the most effective in hair removal and **Nd:YAG 1064 nm** in vascular treatments.

Why Choosing Motus:

Double Wavelength (Alex + Nd:YAG)

Wide range of applications: not only hair removal and pigmented lesions but also vascular treatments, to meet the growing demand of patients.

Moveo Technology

New frontier in hair removal and pigmented lesions: guarantee of safety, comfort, speed and results.

Incomparable Quality to Price Ratio

A successful combination of effectiveness and cost and low maintenance.

MotusAY

THE SCIENCE BEHIND

100% of Energy Absorption with Moveo Technology

The new handpiece technology integrates a sapphire tip that comes in contact with the skin, reducing the reflected energy loss. The new hair removal method consists in repeated passes on treated areas that cause gradual heating of the vital parts of hairs.

Effectiveness + Safety

The absence of energy dispersion means lower power for the same result.

Speed + Comfort

Multipass action allows to treat big areas in few minutes.

A detailed close-up of the Moveo handpiece's connection system. It shows a black cable with a textured grip section, a white plastic connector, and a silver metal shaft. A dotted line points from the text 'New plug-in connection system' to the white connector. The handpiece is shown being inserted into a black handle, which has 'DEKA' visible on its side.

Moveo PL: The New Moveo Handpiece for Pigmented Lesions

Max results are obtained by exploiting the ideal wavelength in pigmentary (Alex 755 nm) in a **low fluence-multipass** delivery process with integrated cooling, giving the greatest comfort and safety to patients.

MOVEO PL is safe, extremely effective and allows to treat any skin type in very few sessions, **with minimal side effects or downtime.**

Simple click to stop and start treatment

Choose up more than 10 Standard Handpieces

2.5-20 mm spots available with automatic spot recognition system and ergonomic connector for air-cooling.

20 mm sapphire tip

Integrated cooling system

THE SCIENCE BEHIND

Revolutionary Technology Innovation

Motus AY makes hair removal with Alex effective, painless and simple for both **light phototypes** and **the darker ones**, as well as with thin and light hair.

The Nd:YAG source broadens the field of action by offering the possibility of dealing with **vascular lesions** such as capillaries, or telangiectasias.

The Floor to Practitioners

“ In the last several years we’ve had lasers that are safe for dark skin, but the limit has been efficacy. But the Motus AY was designed to reduce the laser’s energy loss as it moves over the skin. The concentrated, doubled energy transfer to skin means the Motus works better than other lasers on darker skin tones.”

Dr. Paul Jarrod Frank, Dermatologist,
New York – USA

“ With Motus AY DEKA has changed the whole concept of alexandrite laser. The effectiveness of this laser source is scientifically and clinically recognized for photoepilation. Thanks to the innovative MOVEO Technology, laser hair removal with alexandrite laser is now not only EFFECTIVE but also SAFE and PLEASANT, suitable for darker skin types too”

Prof. Paolo Bonan M.D.
Villa Donatello Clinic, Florence – Italy

THE PERFECT MATCH

MOTUS AY Strength

Operator and patient total comfort benefits:

- Fastest and only **in-motion Alex** and **Nd:YAG**
- **Fluididity** and lightness of the contact handpiece
- **Easy** to learn and use
- Effective on **all phototypes**
- **No energy loss**
- **Fastest** treatment: treats 100 cm² in approx 25 sec.
- **No burning** or skin discolouration
- **No pain**

 **Only for DEKA Users:**

Technical Specifications

MOTUS AY		
Laser Source	Alexandrite 755 nm	Nd:YAG 1064 nm
Energy per Pulse	31 J (max)	63 J (max)
Laser Power	65 W (max)	95 W (max)
Repetition Rate	From 1 to 10 Hz	From 0.3 to 10 Hz
Spot Sizes (optional)	2.5 mm, 5 mm, 7 mm, 10 mm, 12 mm, 14 mm, 15 mm, 16 mm, 18 mm, 20 mm; Moveo HR, Moveo PL	
Aiming Beam	Green Diode Laser @532 nm < 4 mW	
Emission Control	Fingerswitch or Footswitch	
Handpiece Cooling	Integrated Skin Cooler	
Dimensions and Weight	90 (H) cm x 51 (W) cm x 83 (D) cm 90 Kg	
Electrical Requirements	230 Vac – single phase – 50/60 Hz – 16 A	

CAUTION - Visible and invisible laser radiation. Avoid eye or skin exposure to direct or scattered radiation. Class 4 laser product.

DEKA Innate Ability

A spin-off of the El.En. Group, DEKA is a world-class leader in the design and manufacture of lasers and light sources for applications in the medical field. DEKA markets its devices in more than 80 countries throughout an extensive network of international distributors as well as direct offices in Italy, France, Japan and USA. Excellence is the hallmark of DEKA's experience and recognition garnered in the sphere of R&D in over thirty years of activity. Quality, innovation and technological excellence place DEKA and its products in a unique and distinguished position in the global arena. DEKA manufactures laser devices in compliance with the specifications of Directive 93/42/EEC and its quality assurance system is in accordance with the ISO 9001 and ISO 13485 standards.
