

DECOSON

Professional Ultrasound technology

Deep Cleansing • Skin Regeneration • Cosmetic Infusion

What is Decoson

DECOSON is a professional facial treatment device that combines low-frequency ultrasound and galvanic current to deeply cleanse the skin, enhance the penetration of professional cosmetics and stimulate natural tissue regeneration. Designed for beauty salons, spas and aesthetic clinics, it provides visible skin improvement through comfortable, non-invasive treatments suitable for a wide variety of skin conditions.

A must have for skincare: become a skin specialist!

Compact and versatile device for multiple treatments and for different types of skin and needs.

Accessories

How does it work

Two Technologies. One Complete Facial Treatment.

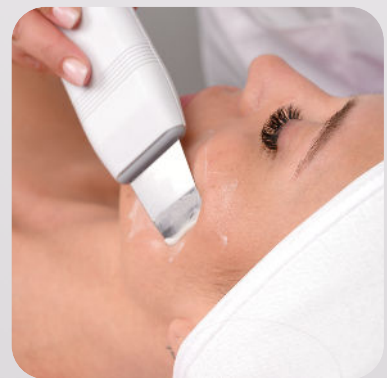

Low-Frequency Ultrasound

- Stimulates cellular activity
- Improves oxygenation
- Supports collagen and elastin production
- Provides a gentle regenerating micro-massage

Galvanic Current

- Deep skin cleansing
- Enhances cosmetic penetration
- Improves tissue conductivity
- Optimises treatment effectiveness

→ Healthier, brighter and revitalised skin.

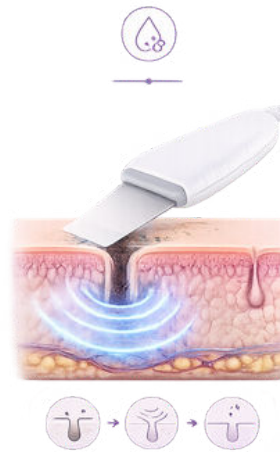

3 TREATMENT MODES

CLEAN

Deep cleansing and skin preparation

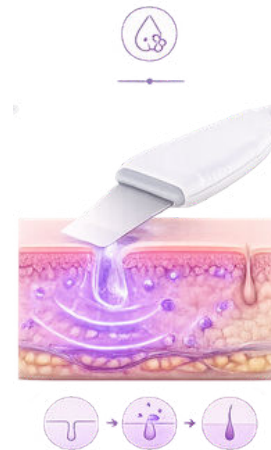

- Removes impurities
- Gently exfoliates
- Brightens the complexion

LEAD IN

Active ingredient infusion

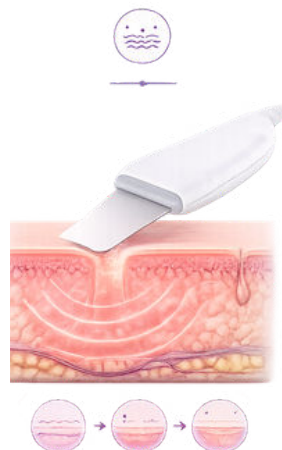

- Improves cosmetic absorption
- Stimulates collagen production
- Deep skin revitalisation

PULSE

Skin regeneration

- Stimulates circulation
- Reduces thermal effect
- Revitalises sensitive skin

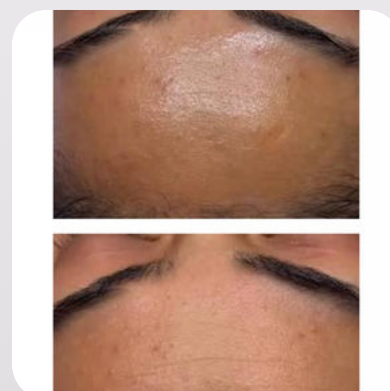

Benefits for your business

- Three treatments in one device
- Easy to learn
- Fast protocols
- Suitable for many skin types
- Excellent retail opportunities
- High treatment profitability
- Low operating costs
- Fast return on investment

Benefits for your clients

- Cleaner and brighter skin
- Improved skin texture
- Better hydration
- Increased skin radiance
- Enhanced cosmetic absorption
- Comfortable, relaxing treatment
- Visible results from the first sessions
